

# Database for Physiological Evaluation of Synthesised Speech Quality-of-Experience (PhySyQX) - EULA (End User License Agreement)

The user, he or she who will make use of the dataset, agrees to the following terms:

## **1 Responsibility**

The user of this dataset must hold a permanent position at an academic institute. Up to three other researchers affiliated with the same institute for whom the user is responsible may be named, which will allow them to work with the PhySyQX database.

## **2 Commercial Use**

The user may only use the dataset for academic research. The user may not use the database for any commercial purposes. Commercial purposes include, but are not limited to:

1. training or proving the efficiency of commercial systems,
2. selling data from the database,
3. creating military applications.

## **3 Distribution**

The user may not distribute the dataset or portions thereof in any way, with the exception of using small portions of data for the exclusive purpose of clarifying academic publications or presentations. Note that publications will have to comply with the terms stated in item 5.

## **4 Access**

The user may only use the dataset after agreeing to the EULA terms. Upon agreeing to the EULA, a link and password to access the dataset will be issued. The user may not grant anyone access to the database by giving out the password.

## 5 Publications

Publications include not only papers, but also presentations for conferences or educational purposes. For publications concerning direct or indirect use of the corpus, the licensee must cite the authors with a citation provided by MuSAE Lab, INRS-EMT, Canada. All documents and papers that report on research that uses the PhySyQX dataset will acknowledge this by citing the following paper:

**Rishabh Gupta, Hubert J. Banville and Tiago H. Falk, PHYSYQX: A Database for Physiological Evaluation of Synthesised Speech Quality-Of-Experience, in Proc. WAS-PAA 2015, 5 pages, 2015.**

## 6 Changes

The PhySyQX dataset administrators reserve the right to change this EULA at any time; users will be informed about changes beforehand and given the choice to opt out of the new EULA. Opting out will render the previous EULA void (and thus the user will lose their right to use the dataset).

## 7 Warranty

The dataset comes without any warranty, the PhySyQX dataset administrators can not be held accountable for any damage (physical, financial or otherwise) caused by the use of the database. No legal claims of any kind can be derived from accepting and using the dataset. The MuSAE Lab at INRS-EMT will try to prevent any damage by keeping the database virus free.

I have read and understood the user agreement and will comply with it.
